

### Features

- Digital indoor and water pool temperature indicator in a single device.
- High brightness characters
- Include indoor and water temperature sensor.
- You can receive/transmit data via communication bus (optional): Modbus RTU RS485
- Degree of protection IP41 or IP65
- Time programming on and off, with automatic summer-winter time change.
- Configurable sampling times.
- Configurable relay alarms

### Applications

- Exterior and indoor swimming pools

### Description

The DTTP is a segments displays digital indicator that shows the indoor temperature and the water temperature of the pool, captured through analog inputs or through sensors or transmitted through communication buses.

There is an IP64 model for outdoor environments with a built-in temperature sensor in the device itself.

It has high brightness segment displays, which allows you to display bright characters with a wide viewing angle. You can also set the on-off time of the display automatically and sampling intervals.

### Models

There are different models of the DTTP indicator that fit each of the installation needs:

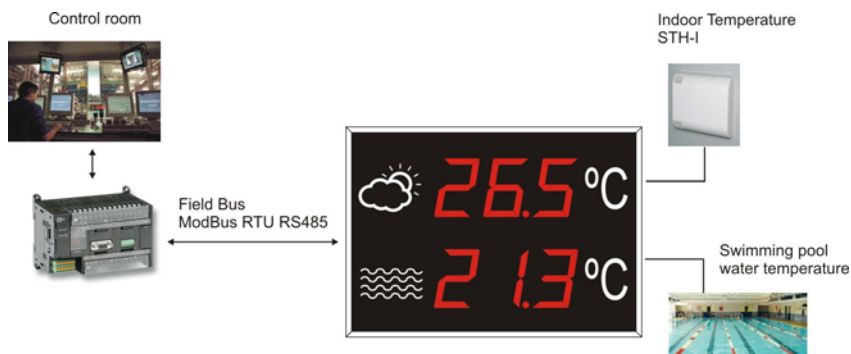

**DTTP-I** has two external sensors to facilitate readings of indoor and pool water temperature (indoor and water conduit temp included with 5m cable). Includes power cable.

**DTTP-C** has two external sensors to facilitate readings of indoor and pool water temperature (indoor and water conduit temp included with 5m cable) and can transmit temperature information via a Modbus RTU RS485 communications bus or receive data to write on the screen . Includes power cable.

**DTTP-EA** allows to connect two external analog inputs for indoor and pool water temperature. Includes power cable.

## Technical specifications

### Parameters

Power supply	240 -110Vac , 50/60 Hz with 1A fuse
Temperature measure	<b>DTTP-I / -C /-EA</b>
Range	-20°C to 50°
Precision	+/- 0.5°C
Resolution	0.1°C
N° inputs	2
Input 1	NTC temperature sensor with STH-I o STH-ES ( I,C ), configurable analog input 0-10V,2-10V,0-5V,4-20mA (EA ). (IP option device has embedded temperature sensor )
Input 2	NTC conduit water temperature sensor ( I,C )( <b>option M8, ½" or sheath with 2m. cable</b> ), configurable analog input 0-10V,2-10V,0-5V,4-20mA (EA )

### Segments display

Vision angle	180 °
Luminous	> 35 mcd per segment
Character dimensions	101 x 60 mm

### Communication bus

<b>DTH-C</b>	ModBus RTU RS485 ( Half Duplex )
Slave	Configurable 0 to 63
Speed	Configurable 300 ,600,1200,2400,4800,9600 and 19200 bauds
Parity	Configurable N,P,I
Funcions	From 1 to 17

### Outputs

<b>Option R</b>	
Output type	NO Relay, Contact 2A 250V
N° Outputs	2 outputs, one for each NTC input
Alarms thresholds	Configurables in menu

### Housing material

	Black painted Iron sheet
Working temperature	-10°C - 40°C
Working humidity	10% to 80% HR without condensation
Storage temperature	- 20°C, +45 °C
Storage humidity	5% to 95% HR without condensation
Protection degree	IP41
Soporte	Tethering wall via screws
Programmable on-off time	Via pushbutton
Sample time	Via pushbutton

## Dimensions

## Option IP

## Dimensions STH-I

## Weight

5.0 Kg
